

Students should consider the following checklist when completing the research report.

It is recommended that once each section is completed the student uses the checklist to ensure he or she is on course.

<b>A Planning</b>	
<b>The scenario</b>	
A client and/or adviser has been identified.	yes
A problem requiring a solution or an unanswered question has been described.	yes
The word count for the scenario is approximately 250.	yes
<b>Initial consultation with client and/or adviser</b>	
The evidence of consultation has been referred to in the scenario.	yes
Any documentation associated with evidence of consultation has been linked to the cover page.	yes
<b>The proposed product</b>	
The proposed product has been identified.	yes
The proposed product resolves the inadequacies identified or the unanswered question.	yes
The justification of the proposed product is approximately 250 words.	yes
<b>Specific performance (success) criteria</b>	
Specific performance criteria have been drawn up that make it possible to evaluate the success of the product in criterion E.	yes

<b>B Solution overview</b>	
<b>Record of tasks</b>	
The <i>Record of tasks</i> form has been used.	yes
The <i>Record of tasks</i> form refers to the product proposed in criterion A.	yes
The <i>Record of tasks</i> form has been updated during the lifetime of the solution.	yes
The <i>Record of tasks</i> form provides a realistic plan and timeline for managing the solution, including the gathering of necessary information, the development of the product and the testing process.	yes
<b>Design overview</b>	
The designs refer to the proposed product identified in criterion A and the <i>Record of tasks</i> form.	yes
The designs include a range of design levels.	yes
The design identifies a range of appropriate techniques and original thinking that will be used in the development of the product.	yes
The designs are in sufficient detail to indicate how the product will function.	yes
The test plan proposed addresses the main types of test appropriate to the product and relates to the specific performance criteria identified in criterion A.	yes

<b>C Development</b>	
The different techniques used to develop the product have been identified.	no
The different algorithms used in the development of the product have been represented diagrammatically.	no
The product includes a range of appropriate techniques.	yes
The appropriateness of the product structure has been justified.	yes
The explanation of why the techniques in the product have been used, including screenshots, has been included.	yes
All sources have been cited using an appropriate referencing style, for example, Harvard, MLA, and so on.	no
The technical documentation is approximately 1,000 words.	yes

<b>D Functionality and extensibility of product</b>	
<b>Functionality</b>	
The product has sufficient extent to enable its effectiveness and functionality to be evaluated.	yes
The product has been thoroughly tested in a range of situations to ensure the product is functional.	no
The tests used to ensure the functionality correspond to those in the completed test plan.	yes
The product has been tested in more than one location under different conditions such as on CD-ROM/DVD or USB.	yes
A video of the product functioning has been included in a commonly used format.	yes
<b>Extensibility</b>	
The design overview provides clear evidence of how the product could be further developed.	yes
Comments are used appropriately to indicate how the product could be maintained by a third party.	yes

<b>E Evaluation</b>	
<b>Client and/or adviser feedback</b>	
Any documentation associated with evidence of feedback has been linked to the cover page.	yes
<b>Client and/or adviser evaluation</b>	
The evaluation refers to the success criteria identified in criterion A.	yes
The evaluation explicitly refers to the feedback obtained from the client and/or adviser.	no
<b>Student recommendations</b>	

The recommendations are appropriate to the client and/or adviser for the future development of the product.	yes
The evaluation of the product and future product development is approximately 500 words.	yes

### Checks before submission

<b>Product</b>	
One folder called "product" has been created, which holds the product.	yes
The product folder structure is intuitive and allows files to be located easily.	yes
There is the appropriate use of file/object/class names throughout the product.	yes
Comments have been used appropriately in the product.	yes
A video of the product functioning has been included in the documentation folder.	yes
Other evidence of the product functioning, such as files included on the CD-ROM/DVD or USB, or the link to the URL, are included where appropriate.	yes
<b>Documentation</b>	
One folder called "documentation" has been created, which holds the documentation files only.	yes
The documentation is easy to navigate and uses the file names prescribed in the guide.	yes

### Cover page

<i>The cover page is not assessed, but will assist the moderator in accessing the different components of the solution.</i>	
The cover page template has been used.	yes
The student's details have been added where appropriate.	
The cover page has been saved in HTML format.	yes
All links within the solution are relative.	yes
The cover page functions as intended.	yes

### Appendix

<i>The Appendix is not assessed, but will assist the moderator in accessing the different components of the solution.</i>	
The appendices have been linked to the cover page.	yes
Any documentary evidence of consultation with and/or feedback from the client is included.	yes

Any additional videos showing the product functioning have been referred to in the text and/or linked to the cover page.	yes
Any additional information in the appendix is clearly linked to the cover page.	yes

### **Final check**

The organization of the solution prescribed in the guide has been adhered to.	yes
The solution is no more than 2,000 words.	yes
The links within the product and documentation (where appropriate) are relative, allowing portability.	yes
The product has been tested in more than one location under different conditions.	yes
The <i>Record of tasks</i> form has been used as well as the cover page.	yes
Any appendices in the solution are clearly referenced in the main body of text.	yes
